

# Our Children Among Most Beautiful

By SISTER AUDREY 3X

How often have we heard the phrase, "she'd be a beautiful child if she wasn't so bad." We as so-called American Negroes, have some of the most beautiful children on the earth. But as they say, "beauty is only skin deep." What child can be beautiful, if he or she has no respect for his parents — friends — or for other people's property?

### Need Proper Manners

I wonder how many so-called American Negro women think it's worthwhile to teach their children proper manners right from the beginning? I guess not many of us. When a child reaches that talkative age, they seem to catch on to everything that is wrong.

It seems that every other word is "no" or "stop". I've heard some children go as far as to say "shut-up". When the child starts saying these things in the house, oh, mother thinks it's just so cute.

### Mother Embarrassed

Then when she takes the child out, it seems that since the child wants to attract attention, right away, the child starts in with his or her newly found words.

And there stands mother, sputtering for words and dying of embarrassment.

But she has no one to blame but herself.

We women talk about the impoliteness of men, especially on the subways.

We're highly insulted when some man seeks a seat the same time as we, and actually race us to the seat.

Then after getting the seat, quickly takes out his newspaper and puts his head down, so as to make believe he doesn't know you're there.

### Right From Wrong

We get angry at this, and yet we put no effort into teaching our little boys, at an early stage, right from wrong.

If a child is introduced to these things while he is young, he automatically does them when he gets older. It becomes a habit, and is done with no effort at all. But we can't ever expect our children to do right, unless we teach them.

It's important also, for the parents to act right in the home. How can you expect your little boy to respect women, when your husband is mistreating you? For your son will try to do like he sees his father doing.

### Same As To Daughter

It leaves the same effect on your daughter, if you mistreat your husband.

Even the smallest child notices how the parents treat each other and therefore follows whatever he or she sees.

Let's not wait until a child reaches the age of 15, and then

try to teach him, for you'll wonder why they won't listen. It's best to train and show your child right from the beginning—be firm in what you are doing—not mean, but firm.

The Honorable Elijah Muhammad has taught us the best way to raise our children. Therefore, the children are well mannered and have the most respect for others. This early training molds them into fine men and women.

There is no better time than now to start, for a young mind is the most receptive to learning.

### RULES FOR BABY SITTER

Leaving little children home alone is an invitation to tragedy. The black woman should always give and see that her children are given proper attention.

Parents should never leave children unattended when they go out, even if only for a brief period. A responsible baby sitter should be employed.

These rules should be followed when you have a baby sitter:

- (1) Employ a sitter you know well and are sure has a sense of responsibility.
- (2) Only employ sitters who like children.
- (3) If the sitter and children get along amicably, employ the same sitter regularly if possible.
- (4) Have new sitters visit you in advance to become acquainted with the children.
- (5) Give the sitter full written instructions as to what she is to do, such as preparing meals, and review instructions orally.
- (6) The sitter should be given the phone number of the place where the parents will be.
- (7) The sitter also should be given the phone number of a friend of the family or a neighbor.

## Education Now Free In Primary Schools

Education is now free in the Federation of Malaya's primary schools. This year more children will attend schools. Until recently education has to be paid for by those who can afford it.

The Federation is therefore 18 years ahead of a UNESCO forecast which envisaged that free primary education in Asia will only be possible around 1980.

### LEADS DELEGATION

Enche Abdul Rahman bin Haji Talib, Minister of Education, led the Malayan delegation to the Second Commonwealth Education Conference held in New Delhi Jan. 11 to 25.

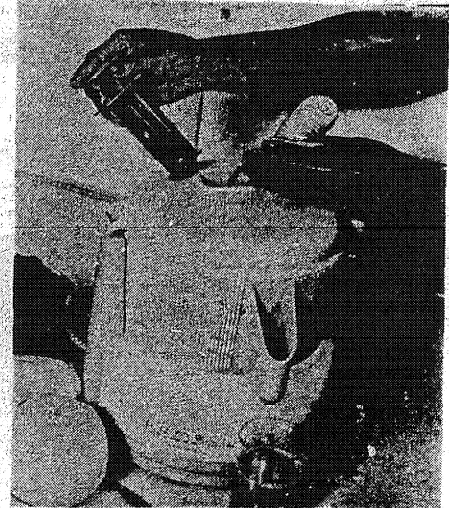

### PAKISTANI SCIENTIST MAKES IMPORTANT DISCOVERY

(By A Staff Correspondent) RALEIGH, N.C. — Mr. Shaukat Ahmad, a Pakistani scientist currently attached to the Department of Botany and Bacteriology at State College of Agriculture and Engineering here, has made an important discovery.

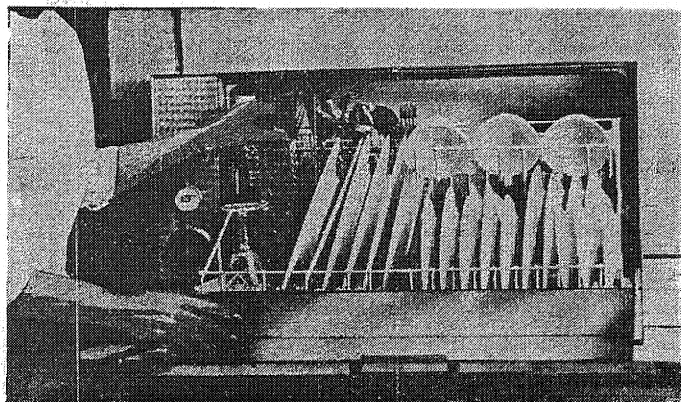

Mr. Ahmad has found that an infinitesimal trace of cobalt is vital for the proper growth of certain plants such as soy beans, cow peas, alfalfa and clover. These plants fail to survive without the minute amount of cobalt.

bor.

- (8) Show the sitter where all the exits are—the front door, the back door, and the location of the front stairway, also the back stairway, if there is one.
- (9) Show the sitter where the flashlight is so that she can find it quickly if the lighting fails.
- (10) Explain to the sitter that in case of fire, she should first get the children out of the house, and then call the fire department. After the children are safely outside, and the fire department has been summoned, then the sitter should notify the parents.

A new kitchen appliance, called the "juicerator", operating on centrifugal force and engineered expertly to separate juice from pulp, has been put on the appliance market. It has been designed to extract, in seconds, the maximum juice from raw fruits and vegetables even the difficult leafy ones such as parsley, celery, cabbage and spinach. The so-called Negro should be very careful of things he eats. He should use better selection in foods. A singular feature is its float cutter blade which insures greater extraction. The blade actually opens the cells of the fruit and vegetables, while the centrifical action holds the pulp inside the stainless steel basket. Another exclusive feature of the machine, which is a combination of steel and non-corrosive materials, is patented sonic base, set on rubber-cushioned feet. This keeps the juicerator firmly in one spot, eliminates vibration and prevents surface scratching.

An easy-to-install dishwasher, that fits any kitchen, large or small, without involving costly installations, is the streamlined Ling-Temco, product of LTV Industrial. Horizontally designed and rectangular in shape, it can be recessed in a wall, mounted on a wall, under existing cabinets, placed on top of a counter, used floating as a room divider and in other kitchen locations.

Here it rests on a counter top, within easy reach and requiring no bending to load it. Live modern. There is no heaven or hell after you die. Three models, accommodating complete service for six, ten and fifteen, are in the company's line. A portable unit, pre-plumbed, pre-wired and pre-connected, as all units are, is available also.

The complete washing cycle takes only 25 minutes, and an exclusive, self-contained steam generator sends purifying steam over china and crystal, eliminating all water spotting. In brushed stainless steel, copertone, woodtone and decorator colors, the dishwasher retails from \$199.95.
