

HOW TO HELP

(*"Reprinted from the June 18, 1965 issue of Muhammad Speaks."*)

Do you ask yourself the question? "What are you doing for yourself?"

In a world that is on its way out, with another new world forging itself in on the old, the average of my poor people here in America have been made to believe that they do not have to even think and do for themselves.

This came from the old slave-master, that they are not responsible for their present nor future.

You actually feel that you are not supposed to give thought to your own responsibility, because of the white slave-master carrying it for you. But, there comes a change-over in the life of everything, and the intelligent human being with changes made frequently.

But you have not been intelligent enough to do much, or make much of a change. Because of this fear of the slave-master, you have dropped far behind the modern way of thinking and doing something for self.

Today you live in the resurrection, and the world expects you to rise from the grave of ignorance, laziness, hopelessness and

despair — as the ever-changing events of the Nation today should warn you to get out. Take your place with the rising tide of your people; do something for yourself. Being irresponsible since the days of our fathers in the Western hemisphere, it causes you to think that you should never be burdened with your own responsibility. But you must have it and care for it yourself.

Why not unite with me and my followers, whom God in Person is with, and Who has visited you and me, for the purpose of giving to you a home on this earth, that you can call your own?

You must qualify to move forward successfully for yourself, your children, and your children's children's children. You see your people throughout the earth stirring up themselves for self. Our brothers in Africa give you a lesson, if only you take heed. They are trying — everyone of them — to keep and maintain Africa for Africans.

You glorify here in the wealth of the white man as though it is yours, and you will foolishly say that his is yours.

The main courses that

our educated people should take is engineering — all types of engineering. Without such knowledge you cannot build a Nation for yourself.

Prepare yourself to be teachers of your own kind. We see our Black brother, the African, coming here, going to colleges and universities, studying every technical advantage to take back home, to his people, so that he may elevate his people and become on the level of all other civilized peoples and governments.

Should this not be a warning to you to do something for self, more constructive than you ever have done; something from the inevitable signs of total destruction of the old world, which you have succeeded so faithfully in helping the white man to build for himself — a monument to civilization? You have never cared to build one for yourself. But today it is a must. So join up with me, and help me and my followers to set a sign in America, preferably Chicago, that will speak for your striving to do something for self, after 100 years now, of so-called freedom.

Every sign you have established was to the
